COMBUSTION, EXPLOSION, AND SHOCK WAVES

Volume 37, Number 1–6, 2001

(A translation of *Fizika Goreniya i Vzryva*)

Engl./Russ.

Volume 42, Number 1, January–February, 2001

Reduction of the Combustion Mechanism of Hydrogen – V. G. Matveev 1 3
Approximate Modeling, a Kinetic Model, and a Caloric Equation of State for Chemically Reacting Gas Mixtures at High Temperatures – Yu. A. Nikolaev 4 6
Flame Propagation in a Variable-Section Channel with Gas Filtration – S. S. Minaev and V. S. Babkin 13 16
Limits of Flame Propagation in a Narrow Channel with Gas Filtration – V. V. Zamashchikov and S. S. Minaev 21 25
Explosion Hazard of Mixtures of Poorly Combustible Chladones with Air at Elevated Pressures – Ya. A. Lisochkin and V. I. Poznyak 27 32
Dynamics of Macroprocesses in a Flame and Heated Jet – A. A. Kuznetsov and O. D. Bukharova 30 35
Self-Oscillations in the Gas Cavity of a Solid Rocket Motor – S. V. Sukhinin and V. F. Akhmadeev 36 42
Ignition of a Solid Through a Detachable Shield – A. G. Knyazeva 46 53
Temperature Field of Bedded Self-Heating of a Bank in a Silo – V. P. Ol'shanskii 53 61
Formulation and Solution of the Problem of Drying of a Layer of Combustible Forest Materials – A. M. Grishin, A. N. Golovanov, L. Yu. Kataeva, and E. L. Loboda 57 65
Combustion and Heat Properties of Lignin-Containing Fuels – O. A. Alekseev, M. É. Shamsutdinov, F. Kh. Kutyshev, and A. V. Kostochko 67 77
Experimental Methods for Studying the Combustion of Granular Powders in a Broad Range of Process Parameters – Yu. F. Khristenko 72 82
Using Unsteadiness of the Processes in Diagnostics of Burning Objects – I. A. Sergienko, N. I. Poletaev, and A. V. Florko 78 89
Stationary and Nonstationary Wave Structures that Arise in Stabilization – A. T. Berlyand, V. V. Vlasenko, and S. V. Svishchev 82 94
Approximate Method for Calculating the Impact Sensitivity Indices of Solid Explosive Mixtures – A. V. Dubovik 99 112
Possibility of Initiating an Explosion of Condensed Energetic Materials by Mechanical Activation of Nucleation Processes upon Impact – O. F. Shlenskii, E. S. Sokolov-Borodkin, and V. N. Chechko 106 120
Dependence of the Shape of a Detonation Wave Front on the Detonation Wave Velocity upon Detonation of a Cylindrical Charge – A. R. Gushanov 113 127
Time Dependence of the Fracture Energy of Metals in Spallation – V. A. Ogorodnikov and A. G. Ivanov 119 133

Volume 37, Number 2, March–April, 2001

Investigation of the Properties of a Kinetic Mechanism Describing the Chemical Structure of RDX Flames. I. Role of Individual Reactions and Species – N. E. Ermolin and V. E. Zarko	123	3
Formation of Dioxins by Incineration of Chlorine-Containing Fuels – G. Ya. Gerasimov	148	29
Hot-Spot Thermal Ignition in a Porous Medium under Conditions of Natural Gas Filtration – R. S. Burkina and E. A. Kozlov	153	35
Gasless Combustion of a Model Multilayer System (Combustion of Disks with a Gap) – S. G. Vadchenko	159	42
Combustion of Titanium with Nonmetal Nitrides – A. É. Grigoryan and A. S. Rogachev	168	51
Macrokinetics of Oxidation of Ultradisperse Aluminum by Water in the Liquid Phase – V. G. Ivanov, M. N. Safronov, and O. V. Gavrilyuk	173	57
Mathematical Simulation of Thermophysical and Thermochemical Processes During Combustion of Intumescent Fire-Protective Coatings – V. L. Strakhov, A. N. Garashchenko, G. V. Kuznetsov, and V. P. Rudzinskii	178	63
Thermal Explosion of a Plate under Boundary Conditions of the Second and Third Kinds – R. Sh. Gainutdinov	187	74
Effect of RDX and HMX on the Efficiency of Catalysts for Double-Base Propellant Combustion – A. P. Denisyuk, Yu. G. Shepelev, D. L. Rusin, and I. V. Shumskii	190	77
Ignition Wave in a Two-Velocity Gas Mixture of Magnesium Particles – Yu. A. Gosteev and A. V. Fedorov	197	84
Simulation of Convective Detonation Waves in a Porous Medium by the Lattice Gas Method – A. P. Ershov, A. L. Kupershtokh, and D. A. Medvedev	206	94
Detonation of Secondary Explosives in a Vacuum Suspension – A. V. Pinaev	214	103
Effect of Shock-Wave Loading Conditions on the Behavior of a PETN-Based Plastic Explosive – V. K. Golubev and A. P. Pogorelov	219	109
Determination of the Slope of the Phase-Equilibrium Line by Lagrangian Gauges in Shock Waves – A. M. Molodets	225	116
Application of the Electromagnetic Model for Diagnosing Shock-Wave Processes in Metals – S. D. Gilev	230	121
Thermocouple Method for Studying Pressure Fields in Metals under Dynamic Loading – V. V. Pai, I. V. Yakovlev, and G. E. Kuz'min	236	128
The Use of Utilizable Explosives to Increase the Efficiency of an Explosion – A. N. Afanasenkov and V. V. Galkin	239	131
Specific Features of the Formation of Crystalline Phases of the W–C–N System in a Cumulative Process – S. A. Kinelovskii and S. A. Gromilov	243	135

Volume 37, Number 3, May–June, 2001

Investigation of the Properties of a Kinetic Mechanism Describing the Chemical Structure of RDX Flames. II. Construction of a Reduced Kinetic Scheme – N. E. Ermolin and V. E. Zarko	247	3
Two-Dimensional Stability of the "Pole" Solutions of the Sivashinsky Equation – S. S. Minaev	255	12
Effect of Radiant Heat Transfer on the Minimum Spark-Ignition Energy of Gas Suspensions – A. Yu. Krainov	259	16
Mathematical Combustion Model of a Two-Component Gas Suspension Including a Powder Combustible and a Powder Oxidizer – D. A. Yagodnikov and A. N. Bobrov	267	25
"Roughness" of the Gasless Combustion Front – V. K. Smolyakov	274	33
Recombination of Electrons in the Wake behind a Body Made of an Aluminum–Magnesium Alloy, which Flies in an Air–Xenon Mixture with a Hypersonic Velocity – N. N. Pilyugin and S. S. Chukin	285	45
Conditions for Ignition of Iron and Carbon Steel in Oxygen – V. I. Bolobov	292	52
Filtration-Diffusion Combustion Limit of a Titanium Powder in Nitrogen upon Degassing – S. V. Kostin and V. V. Barzykin	297	58
Ignition of Disperse Systems During Stage Processes on Their Surface – A. N. Zolotko, Ya. I. Vovchuk, and T. A. Yarovoi	303	64
Thermal Destruction of Solid Fuel in a Barrel-Type Pyrolysis Reactor – G. Ya. Gerasimov and G. K. Ter-Oganesyan	309	70
Simulation of the Erosion Burning of a Granular Propellant – M. M. Gorokhov and I. G. Rusyak	315	76
Low-Frequency Instability of Solid Rocket Motors. Influence of the Mache Effect and Charge Geometry – I. G. Assovskii and S. A. Rashkovskii	321	83
Ignition of Crystalline Explosives – A. G. Knyazeva	331	94
Kinetics of Chemical Reactions During Detonation of Mixtures of Organic Substances with Nitric Acid – V. M. Raikova, B. N. Kondrikov, and A. Khalak	341	106
Strength of Commercial Explosives – A. N. Afanasenkov, L. I. Kotova, B. N. Kukib	349	115
Structure of a Shaped Jet Formed in an Oblique Collision of Flat Metal Plates – O. B. Drennov	359	126

Volume 37, Number 4, July–August, 2001

Minimum Specific Heat Power of Ignition of Gas Mixtures as a Thermal Sensitivity Criterion – V. F. Proskudin, P. G. Berezhko, V. V. Yaroshenko, A. A. Seleznev, A. S. Bulannikov, and E. N. Belyaev	367	3
Absolute and Convective Instability of an Oblique Flame Front in a Combustible Gas Mixture Flow – S. G. Kotenkov and I. S. Shikina	372	9

	Engl.	Russ.
Estimation of the Efficiency of Inhibitors Acting on Combustion of Gases – V. V. Zamashchikov and V. A. Bunev	378	15
Effect of the Fuel Type on the Characteristics of Air-Breathing Engines – V. V. Shumskii	387	25
Filtration Combustion of Liquid Monofuels – N. A. Kakutkina and V. A. Bunev	395	34
Effect of Stefan Flow on Combustion Characteristics of a Moving Carbon Particle – V. V. Kalinchak, S. G. Orlovskaya, and Yu. V. Prudnikova	402	41
Modeling of the Transformation of Sulfur Compounds in Oxygen Gasification of Coal Dust – G. Ya. Gerasimov and T. M. Bogacheva	406	46
Oxidation of Powdered Alloys of Aluminum and Cerium during Heating in Air – V. G. Shevchenko, V. I. Kononenko, I. A. Chupova, I. N. Latosh, and N. V. Lukin	413	53
Reactivity of Aluminum Powders – A. P. Il'in, A. A. Gromov, and G. V. Yablunovskii	418	58
Transformation of the Thermal Structure of the Combustion Wave and Morphology of the Combustion Products of the SiO_2–Al(Zr)–C System near the Extinction Limit – G. A. Nersisyan, S. L. Kharatyan, L. S. Abovyan, and G. L. Khachatryan	423	63
Combustion of Composite Metal Systems – V. I. Itin, Yu. S. Naiborodenko, and A. D. Bratchikov	429	69
Convective Combustion of "Gasless" Systems – B. S. Seplyarskii and N. I. Vaganova	432	73
Use of Moire Tomography to Measure the Temperature Field of the Flame of a Pyrotechnical Composition from Its Infrared Radiation – Wang Xue, Wu Donglou, and Pan Gongpei	440	82
Variation of Interior Ballistic Parameters at a Constant Mean Pressure in the Postprojectile Space of a Gun Barrel – A. M. Lipanov	443	86
Explosion Hazard of Mixtures of Freons R31 and R32 with Air at Different Pressures – Ya. A. Lisochkin and V. I. Poznyak	448	92
Passage of a Bubble-Detonation Wave into a Chemically Inactive Bubble Medium – A. I. Sychev	451	96
Use of the Grüneisen Coefficient in Calculations of Temperature along the Isentrope of Elementary Substances – A. M. Molodets	455	100
Focusing of Shock Waves upon Explosion of Annular Charges in Air – A. V. Pinaev, V. T. Kuzavov, and V. K. Kedrinskii	461	106
Shock Compression of Hydrocarbons of the General Formula C_5H_8 – M. F. Gogulya and I. M. Voskoboinikov	464	109
Simulation of the Behavior of Mixtures of Heavy Particles behind a Shock-Wave Front – D. V. Voronin and V. F. Anisichkin	470	116
Effect of Properties of Explosives on Attenuation of Blast Waves in Ground – A. V. Mikhalyuk and V. V. Zakharov	475	122
Nanosize Powder of Zirconia. Explosive Method of Production and Properties – A. A. Bukaemskii	481	129

	Engl.	Russ.
Structure and Properties of an Amorphous Nickel–Titanium Alloy after Explosive Compaction – L. S. Tarasova, V. P. Zhereb, and V. I. Kirko	486	135
Products of Combustion of Aluminum Hydride in Air – A. P. Il'in, N. V. Bychin, and A. A. Gromov	490	139

Volume 37, Number 5, September–October, 2001

Thermal Interaction of Two Flame Fronts Propagating in Channels with Opposing Gas Flows – R. V. Fursenko, S. S. Minaev, and V. S. Babkin	493	3
Critical Conditions of Chain Thermal Explosion – V. V. Azatyan, I. A. Bolod'yan, Yu. N. Shebeko, and S. N. Kopylov	501	12
Flammability of Vapor–Gas Mixtures C_2F_4, SO_3, and $C_2F_4OSO_2$ – Ya. A. Lisochkin and V. I. Poznyak	512	24
Stabilization of the Flame of a Powdered Metal Combustible in a Turbulent Air Flow – A. G. Egorov, E. D. Kal'nei, and A. P. Shaikin	516	28
Parametric Analysis of the Simplest Model of the Theory of Thermal Explosion — the Zel'dovich–Semenov Model – V. I. Bykov and S. B. Tsybenova	523	36
Heat Transfer of Submicron MgO Particles in the Combustion Zone of Single Magnesium Particles – I. A. Florko, N. I. Poletaev, A. V. Florko, and A. N. Zolotko	535	49
Convective Regime of Filtration Combustion of Energetic Materials in a Cocurrent Flow of Their Combustion Products – L. K. Gusachenko, V. E. Zarko, Yu. Yu. Serebryakov, V. V. Karasev, and V. A. Shandakov	540	55
Combustion of Solid-Propellant Charges with Highly Progressive Gas Release – A. M. Lipanov	550	66
Extinction of Combustible Forest Materials by Constant and Varying Actions of an Inert Gas Flow in the Combustion Zone – A. M. Grishin and A. N. Golovanov	558	75
Detonation and Physicochemical Properties of Cannon Powders – I. V. Zanegin and S. I. Karachinskii	563	81
Shock-Wave Initiation of Detonation of Double-Base Propellants – A. N. Afanasenkov	567	85
Initiation of a Porous Explosive by Overdriven Gas Detonation Products – V. V. Grigor'ev, L. A. Luk'yanchikov, É. R. Pruuél, A. A. Vasil'ev	572	90
Mechanism of Formation of a Fast Gas Jet – Yu. V. Bat'kov, A. D. Kovtun, S. A. Novikov, V. I. Skokov, and L. A. Tolstikova	580	98
Application of Synchrotron Radiation for Studying Detonation and Shock-Wave Processes – A. N. Aleshaev, P. I. Zubkov, G. N. Kulipanov, L. A. Luk'yanchikov, N. Z. Lyakhov, S. I. Mishnev, K. A. Ten, V. M. Titov, B. P. Tolochko, M. G. Fedotov, and M. A. Sheromov	585	104
Explosive Synthesis of Ultradisperse Aluminum Oxide in an Oxygen-Containing Medium – A. A. Bukaemskii and A. G. Beloshapko	594	114

	Engl.	Russ.
Dependence of the Longitudinal Velocity of Sound in Constructional Ceramic Materials on Pressure and Damage Rate – V. A. Skripnyak, E. G. Skripnyak, and T. V. Zhukova	600	121
Attenuation of Blast Overpressures from Liquid in an Elastic Shell – B. E. Gel'fand, M. V. Sil'nikov, A. I. Mikhailin, and A. V. Orlov	607	128
The Effect of Rigid Boundaries on the Directionality of an Excavating Explosion – K. V. Alfer'ev, V. V. Borovikov, and S. D. Lyubarskii	613	134

Volume 37, Number 6, November–December, 2001

	Engl.	Russ.
Two-Dimensional Semi-Empirical Numerical Model for Analysis of Experimental Data on Supersonic Combustion of Hydrogen – O. M. Kolesnikov	617	3
Nonequilibrium Thermodynamics of Autowaves of Laminar Combustion – A. P. Gerasev	626	13
Parametric Analysis of the Models of a Stirred Tank Reactor and a Tube Reactor – V. I. Bykov and S. B. Tsybenova	634	22
Effect of Radiative Heat Transfer on the Thermal Stability of Spread of an Upper-Forest Fire Front – A. M. Grishin, E. E. Zelenskii, and D. G. Vylegzhanin	641	30
Ignition of the Gas–Coal Dust Mixture. Pointwise Approximation – Yu. A. Gosteev and A. V. Fedorov	646	36
Numerical Analysis of Conditions for Ignition of Compact Metal Specimens and Foil in Oxygen – V. I. Bolobov and N. A. Podlevskikh	655	46
Combustion of Ultrafine Aluminum in Air – A. P. Il'in, A. A. Gromov, V. I. Vereshchagin, E. M. Popenko, V. A. Surgin, and H. Lehn	664	56
Critical Autoignition Conditions for Heterogeneous Condensed Systems in the Presence of Phase Transformations – V. V. Evstigneev, S. V. Krasnoshchekov, and V. Yu. Filimonov	669	61
Dynamics of Phase Transitions in the SHS of a 3Cu–Al Powder Mixture in the Regime of Thermal Explosion – D. Yu. Kovalev, V. I. Ponomarev, and V. D. Zozulya	673	66
Deformations in a Burning Specimen and Their Effect on the Heat Transfer through a Bulkhead – V. F. Proskudin	678	71
Explosive Hazard of Vapor–Gas Mixtures of Fluoride-Containing Saturated Hydrocarbons with Fluoride and Chlorine Trifluoride – Ya. A. Lisochkin and V. I. Poznyak	683	77
Effect of the Location of the Detonation Initiation Point and the Position of the Air–Fuel Cloud on Explosion-Field Parameters – V. V. Koren'kov and A. S. Obukhov	688	82
Current Waves Generated by Detonation of an Explosive in a Magnetic Field – S. D. Gilev and A. M. Ryabchun	698	93
Failure of a Steel Spherical Projectile upon Impact on High-Porous Sheets – P. V. Lavrukhov, A. V. Plastinin, and V. V. Sil'vestrov	707	102
Shock-Wave Deformation and Fracture of Zirconium Dioxide Ceramics of Various Fractional Composition and Porosity – V. A. Ogorodnikov, A. G. Ivanov,		

S. V. Erunov, V. I. Luchinin, V. N. Mineev, F. A. Akopov, and G. P. Chernyshov 717 113
Hardening of St. 3 Steel by Shock-Wave Action – A. A. Bukaemskii, V. I. Kirko, and D. E. Talabuev 723 119
Limits of Increasing the Penetration of Shaped-Charge Jets by Pulsed Thermal Action on Shaped-Charge Liners – A. V. Babkin, P. A. Bondarenko, S. V. Fedorov, S. V. Ladov, V. I. Kolpakov, and S. G. Andreev 727 124
Charges and Fractal Properties of Nanoparticles — Combustion Products of Aluminum Agglomerates – V. V. Karasev, A. A. Onishchuk, O. G. Glotov, A. M. Baklanov, V. E. Zarko, V. N. Panfilov 734 133
